Summary

Dedicated Software Engineer specializing in Java, Spring Boot, and enterprise backend systems, with proven contributions to OpenMRS and the Hiero/Hedera ecosystem. Skilled in REST/gRPC APIs, decentralized trust technologies, and smart contract integration for scalable Java solutions.

Education

Bugema University Software Engineering
Information Technology Remote • 3years

Acquiring deep technical proficiency in software engineering methodologies while simultaneously contributing to large-scale, enterprise-grade open-source modules.

<https://bugemauniv.ac.ug/>

Experience

OpenMRS Remote
Full Stack Dev-2 3years

As a **Stage 2 Developer**, I lead full-stack **Java/React** development within squads, managing high-priority **Jira Epics** and mentoring new contributors to ensure scalable, high-quality open-source architecture.

<https://openmrs.org/community/>

Google Summer of Code Remote
Intern 4 months

Architected the OpenMRS **Fast Data Entry** module using **React Form Engine** and **Spring Boot**, optimizing clinical workflows through production-ready code and high-performance backend integration.

<https://summerofcode.withgoogle.com/>

Projects

Twiihex
Escrow-as-a-Service platform for East African social commerce, utilizing Hedera HTS and HCS
